

Rina Steenkamp
Privacy and technology

E: rina@steenkamp-ict.com

W: www.steenkamp-ict.com

Experience: since November 2007 I've been working as a technologist for the Dutch data protection authority. My work involves anything where technology affects privacy or vice versa. Earlier I worked as an IT auditor for a governmental organisation, as a consultant in the private sector with QA, testing and IT auditing as my main areas of expertise, and in various systems development positions. I have extensive experience in both the public and the private sector. More information: www.steenkamp-ict.com/cv/exp.html.

Education: currently I'm following the part-time Master in Compliance Management course at Technical University, Delft. in 2005 I graduated from the post-doctoral IT auditing course at Erasmus University, Rotterdam. In 1997 I completed the AMBI course. More information: www.steenkamp-ict.com/cv/ed.html.

Miscellaneous: in 2007 I co-edited and contributed a chapter to 'Geboeid door ketens', a Dutch-language book about chain automation in the public sector. Also, I'm active in NOREA, the Dutch professional society of IT auditors, and in PvIB, an information security society. More information: www.steenkamp-ict.com/cv/publ.html.

Dutch data protection authority: since November 2007 I've been working as a technologist for the Dutch data protection authority. My work involves anything where technology affects privacy or vice versa. I have participated in investigations of processing of personal data, and I co-authored privacy guidelines and opinions on new legislation, and acted as project manager for a number of these activities.

Inspectie Werk en Inkomen: from February 2003 until November 2007 I worked as an IT auditor / project manager for the Inspectie Werk en Inkomen, an independent "watchdog" organisation within the Dutch Ministry of Social Affairs and Employment. I worked on several investigations in the areas of information security, privacy, and the feasibility of large, innovative IT projects. Several of these investigations have resulted in public reports.

Sogeti Nederland B.V.: from May 1997 until February 2003 I worked for Sogeti Nederland B.V. (formerly IQUIP Informatica B.V.) as a quality consultant. For a number of different clients, mostly banks, I've been involved in test process improvement projects, IT auditing and consultancy. I've developed two Intranet websites for clients, and also worked on Iquip's Intranet site. I performed audits at client's offices in Hong Kong, Singapore, Sao Paulo and Sydney, and also spent a month in London working on a client's Intranet site.
